

We're in your community...

here for your health.

We're your partners in good health. Our programs and services focus on three main areas:

- **Promote**

healthy lifestyles including nutrition, active living, reproductive, sexual and dental health, and child development.

- **Prevent**

tobacco use, substance and alcohol misuse, and injuries. Provide clinical services for immunization, sexual health and genetics

- **Protect**

our communities from infectious diseases and environmental hazards in food, water, air and soil. Prepare for, respond to and recover from major emergency situations.
