

SMOKING IN MOTOR VEHICLES WITH CHILDREN PRESENT

October, 2008

THE LAW

- As of January 21, 2009, the *Smoke-Free Ontario Amendment Act 2008* will prohibit persons from smoking or having lighted tobacco in a motor vehicle if another person who is less than 16 years old is inside the vehicle.
- Any person – driver or passenger – in the car, who is smoking while someone else under the age of 16 is present, will be committing an offence.
- The law will apply to both moving and stationary vehicles and will apply to motor vehicles, regardless of whether any window, sunroof, rooftop, door, or other feature of the vehicle is open.

PURPOSE

- To protect children from the harmful health effects caused by exposure to second-hand smoke in motor vehicles.

SECOND-HAND SMOKE AND CHILDREN

- Second-hand smoke in motor vehicles can be up to 27 times greater than in a smoker's home.
- Children are especially vulnerable to second-hand smoke because they breathe more air relative to body weight. As a result, they absorb more tobacco smoke toxins than adults.
- Children who breathe second-hand smoke are more likely to suffer health problems such as sudden infant death syndrome, asthma, and cancer and cardiac disease later in life.
- Exposure to second-hand smoke has also been linked to lower cognitive test scores compared with children who were not exposed.

ENFORCEMENT

- Every person who fails to comply with the prohibition will be guilty of an offence and subject to a set fine of \$250.
- Police officers will enforce the law.
